2.	Report on Bluffton WWT meeting – Greg Castilow and Diana Toth	WWT has capacity to accept wastewater but 24 inch interceptor is at capacity and surcharges during wet weather. Proposed solutions would be costly. The proximity of Craigville to the McKinney/Paxon was discussed and feasibility of a Craigville sewer system being combined with the sewer for McKinney/Paxon region.
3.	DLZ reports on meeting with health department and local contractor L.A. Brown	Results of 2008 water testing were similar to those taken in 2000. Both tests show high E Coli levels.
